KPIs & MONITORING

WHAT WE DO WHAT WE DO

KPIs & MONITORING DATA TO GET YOU FORWARD.

Especially in the cost-driven aviation industry, KPI monitoring has become one of the most prominent management tools. The goal is to provide data for business improvement aiming at understanding, learning and boosting performance.

As a busy user of sophisticated IT tools in our operation at Stuttgart Airport we consider the analysis of KPIs a key task in our daily business. This experience in addition to long-standing project know-how in the area of data-driven decision-making renders us an excellent partner to solve your problems and reach your goals by delivering the data to get you forward.

Clients

Partners:

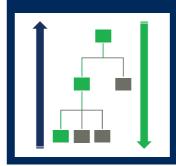

Our Approach

For a successful monitoring there is no blueprint. Together with you, we create an individual solution perfectly suited to solve your individual problems and reach your business goals. Backed by best practice from a variety of projects and our consultants' experience from the own operation COST AVIATION delivers you a long-term solution via knowledge-transfer on the spot.

1

STRATEGY

We elaborate a suitable setup with you featuring the right choice of KPIs and the definition of relevant interfaces.

2

TARGETS

Alignment of KPIs and individual business goals.

3

LONG-TERM SOLUTION

Continuous monitoring and optimization according to current trends for long-term success.

Your Result

Our individual solution delivers long-term value for your operation. The setup will support your every-day decisions with the data you really need, based on our long-term experience with data analysis in aviation. The setup can be leveraged according to your individual needs, leaving you with the necessary flexibility and transparency to succeed in this volatile environment.
